ABSTRACT

This is the first of five volumes comprising a directory of public and nonpublic elementary and secondary day schools in the United States and outlying areas for 1968-69. This volume lists names and addresses of public schools in the North Atlantic Region. Institutional information includes grade span; number of pupils in prekindergarten and kindergarten, elementary grades, and high school; number of teachers in each of these categories; and number of high school graduates in 1967-68. Indications are provided as to types of programs offered, including regular day school programs, special programs for the handicapped, vocational education programs, special programs for the educationally disadvantaged, and adult education programs. District names are provided for each listing. Related documents are EA 002 918, EA 002 866, and EA 002 864. (DE)

FOREWORD

This publication is one of five volumes comprising a directory based on the 1968-69 universe of public and nonpublic elementary and secondary day schools in the United States and outlying areas. Volumes I, II, III, and IV list (by geographical region) the public schools; the fifth volume lists the nonpublic schools.

This is Volume I and covers public schools in the North Atlantic region. It lists data for approximately 98 percent of the known public schools in the region. The school names were obtained from the education agencies of each State, State education directories, and lists of schools that came to our attention in other ways.

Although the establishment of a current population frame for sampling elementary and secondary schools was the basic reason for conducting the 1968-69 school universe survey, the publication in directory form answers the needs of many public and private research and planning agencies that require data for individual schools. It also allows the National Center for Educational Statistics to respond uniformly to the numerous requests received for information about individual schools.

For their fine cooperation and the completeness of the data reported, we are indebted to State, district, and local school superintendents and school principals in the States of the North Atlantic region. For their high sense of responsibility, untiring effort, and attention to detail, we owe thanks to the statistical and clerical personnel of the National Center for Educational Statistics, particularly to Linda A. Barker, Lynn Fox, and Beatrice O. Mongello of this Branch.

INTRODUCTION

Description of Directory

The U. S. Office of Education has undertaken, for the first time, to compile and issue a comprehensive listing of every elementary and secondary day school, both public and nonpublic, in the Nation. Earlier publications were narrower in scope and contained only partial information. For example, OE published 12 directories of public secondary schools between 1912-13 and 1958-59; usually these were limited to accredited institutions and sometimes included accredited nonpublic secondary schools. Also, OE issued two nonpublic school directories, for 1960-61 (secondary only) and 1965-66 (elementary and secondary). No attempt had ever been made before, however, to include the public elementary schools.

To avoid the extreme bulkiness of a single-volume list, the 114,000 schools in the 1968-69 survey are presented in five parts--the public schools in four separate regional volumes and all the nonpublic schools in another. The regional groupings for the public schools are as follows:

Volume I, North Atlantic

Connecticut
Delaware
Maine
Maryland
Massachusetts
New Hampshire
New Jersey
New York
Pennsylvania
Rhode Island
Vermont
District of Columbia

Volume II, Great Lakes and Plains

Illinois
Indiana
Iowa
Kansas
Michigan
Minnesota
Missouri
Nebraska
North Dakota
Ohio
South Dakota
Wisconsin

Volume III, Southeast

Alabama
Arkansas
Florida
Georgia
Kentucky
Louisiana
Mississippi
North Carolina
South Carolina
Tennessee
Virginia
West Virginia

Volume IV, West and Southwest and Outlying Areas

Alaska
Arizona
California
Colorado
Hawaii
Idaho
Montana
Nevada
New Mexico
Oklahoma
Oregon
Texas
Utah
Washington
Wyoming

> Outlying areas of the United States and overseas schools for American dependents also appear in this volume.

The volumes are being published as the processing of data is completed, their order depending largely upon the rate and adequacy of response from all of the States in each region.

This publication, volume I, covers the public schools in the 11 States in the North Atlantic region and the District of Columbia. Schools are arranged alphabetically by State, post office, and name of school, with identification of the school district of which the school is a part. Also shown are 1968-69 statistics on grade span, number of pupils, number of teachers, program offerings, and number of 1967-68 high school graduates (regional summary by State on page 9).

Collection of Data

Detailed information on each school was collected by means of a brief questionnaire, OE Form 2304, a copy of which is included in the appendix to this volume. These forms were mailed by the Office of Education beginning October 1, 1968. States that had all or most of the requested data on computers or in other electronic form were provided with a punched card format with instructions comparable to those being used for processing within the U. S. Office of Education.

School-by-school data were obtained through various procedures chosen by the State education agency from options set forth in an inquiry from the National Center for Educational Statistics. The choices were as follows: In three States, questionnaires were mailed directly to the school districts; in one, responses were obtained through the county school superintendents; 14 States and Puerto Rico mailed the forms to their schools or school districts, which responded directly to the Office of Education; 15 States and all outlying areas except Puerto Rico filled out the standard report forms for their schools from records and other sources in their offices; and 17 States sent their responses on punched cards tailored to the prescribed format. Responses from schools operated by the Department of Defense and the Bureau of Indian Affairs were reported on the form by a request routed through those agencies and coordinated by them.

For various reasons, very few States were able to return their forms by the requested due date, the end of December. Several States responded as late as April and May. For example, a major city school shutdown was a factor in the late response from one State and continuing reorganization of school districts in several States caused delays, affecting the processing of data for the North Atlantic and the Great Lakes and Plains regions. However, cooperation from State education agencies was excellent in spite of a short lead time.

Coverage

Included in the survey were all schools operating at the elementary or secondary level and offering regular school subjects in the fall of the 1968-69 school year. These consisted of all nonpublic and public schools, including public schools operated by State, county, and Federal agencies as well as those included in local public school systems.

Excluded were separately organized kindergartens and prekindergartens; but the preprimary parts of elementary schools were included, and their pupils and teachers, where separately available, are shown in this directory. Also excluded were night schools, tutoring schools and clinics, custodial institutions without general education programs, nonacademic vocational or technical schools, and junior colleges.

Definitions of Terms

Elementary, secondary. Respondents were instructed to report pupils and teachers by educational level. The classification of schools as elementary or secondary is based on definitions in Handbook I, The Common Core of State Educational Information. Thus, an organizational arrangement consisting of grades 1 through 12 is divided into grades 1 through 6 and 7 through 12, 1 through 8 and 9 through 12, or some other pattern, depending upon the particular school district organization; i.e., whether 7th and 8th graders are taught as elementary-level students or as secondary-level students.

Grades beyond grade 8 are generally considered secondary. In some instances, however, such as in Amish or Mennonite communities, where it is customary for children to be kept in elementary school organizations through compulsory school age, schools reporting grades 1 through 9 or 1 through 10 are shown as elementary, if so classified by the respondents.

Secondary School. This term encompasses all high schools, including junior high and intermediate schools as well as vocational and trade schools, if they offer academic work at a level beyond the elementary school and below college-level work. "Middle" schools are classified either elementary or secondary, as designated by the respondents.

Public School. For this directory, public schools are defined as schools that receive their principal support from local, State, or Federal funds. They include regular day schools operated by local school systems, State and federally operated schools such as special-purpose institutional schools for the physically or mentally handicapped or for wards of the State or Federal Government, schools operated by the Department of Defense on military bases within the United States,[1] and Indian schools under the jurisdiction of the Bureau of Indian Affairs. In the listings, State and federally operated schools are identified as "State" or "Federal" in the school district column since they do not belong to any local school district.

Teacher. A teacher is defined as "a staff member performing assigned professional activities in guiding and directing the learning experiences of pupils in an institutional situation." Numbers of teachers are reported in full-time equivalents, meaning that they represent the number of full-time teaching positions, rather than the number of separate individuals employed full time or part time in teaching functions. For example, a principal or librarian who teaches half days is counted as 0.5 of a teacher, and an individual who comes into the school to teach music 2 half days per week, as 0.2 of a teacher. Teacher aides and assistants are not included.

---

[1] Department of Defense overseas schools are included in Volume IV, the West and Southwest Region.

Graduates. This term is defined as the number of pupils graduated from the 12th grade during the 1967 summer session and the 1967-68 school year, the year preceding that for which all other data are shown.

Programs Offered. The choice of programs offered was limited to five categories that are indicated in the directory by letter designation, as follows:

R - Regular day school program

H - Special program for the handicapped

V - Vocational education program

D - Special program for the educationally disadvantaged

A - Adult education program

If only adult or vocational education was checked, respondents were asked to verify that a general education program was being offered concurrently and that the school was offering regular day school classes before being included in this directory. Every effort was made to eliminate dual enrollment between regular day schools and specially organized vocational education (occupational) programs.

Comparability with Related Reports

The data in this volume represent the 18,857 elementary and secondary schools in the North Atlantic region for which reports were received prior to closeout and found usable. Aside from the fact that reports were not received from approximately 400 schools, the figures are not entirely comparable with those published in the Office of Education's Fall 1968 Survey of Public Schools (OE-20007-68) because of differences in coverage and type of respondent. Whereas the annual fall survey covers only those schools operated by local educational agencies, an attempt was made in the School Universe Survey (used for this directory) to obtain data for all types of public schools, whether operated by entities of local, county, State, or Federal Government. The respondents in the 1968 fall survey were the State educational agencies, which have had 15 years of experience in reporting, while the respondents in this first school universe effort was sometimes an administrative unit other than the SEA (local educational agency, school principal, etc.). The comparability of data for those schools covered in both surveys was affected to the extent that there were lack of familiarity with standard terminology and varying interpretations of reporting requirements at the various levels.

A particular difficulty in comparing State-reported data with data received for individual schools exists in this region. In several of the New England States, there are public schools, nonpublic schools, and quasi-public academies which have both privately and publicly supported students. The latter are sometimes reported as public and sometimes considered as nonpublic, depending upon the particular year's financing. This fact may account for year-to-year variations in reports received from these States.

A further complication arises from the fact that the State education agency may report as public those students attending quasi-public academies at public expense, while still including the institutions and the remainder of the students in nonpublic school statistics. This procedure may account for the difference of 5,524 secondary school students and 1,706 high school graduates in Vermont between the 1968 fall survey and the current study. The discrepancy in elementary teachers and enrollment in Maine and Rhode Island may be related in part to a similar difference between individual school and Statewide reporting.

As in other regions, a number of individual high schools reported no graduates. The State of Massachusetts was unable to supply data on 1967-68 graduates by school for any of its high schools.

Abbreviations

School names are consistently abbreviated throughout the directory, except for initial or most significant words, including proper names of persons. Geographical place names, such as post offices, villages, and cities, are abbreviated, when too long for the allotted space, to the designations shown in ZIP Code Abbreviations for Use with ZIP Code (POD Publication 59).

Following is a post office list of two-letter State abbreviations used in this directory as needed:

1/ Data in this table represent only the 18,857 schools in the North Atlantic region for which reports were received. Aside from the fact that reports were not received from approximately 400 schools, the figures are not entirely comparable with those published in the Office of Education's Fall 1968 Survey of Public Schools (OE-20007-68) because of differences in coverage and type of respondents. For a more complete statement on such differences, see section on Comparability with Related Reports.

2/ Does not include pupils and teachers in separately organized preprimary schools.

3/ The total figures shown here for Maine and New Hampshire include summary data for some schools for which individual data are not presented in the directory.

4/ Data for 1968-69 graduates by school not available. Figure shown is that published in the Office of Education's Fall 1968 Survey of Public Schools (OE-20007-68).

ELEMENTARY AND SECONDARY DAY SCHOOLS
BY STATE

NORTH ATLANTIC REGION

10/11

Notes to the Users of This Directory

Explanations which apply generally to data for an entire State appear as a headnote at the beginning of the listing.

An asterisk (*) at the left of a grade span entry indicates that data are not available separately for preschool pupils and/or teachers, although the school offers a preschool program. A blank in the space for teachers of kindergarten or prekindergarten programs shown without the asterisk indicates that less than one full-time-equivalent teacher was reported.

Symbols for type of program offered:

R - Regular day school program
H - Special program for the handicapped
V - Vocational education program
D - Special program for the educationally disadvantaged
A - Adult education program

Other symbols:

& And
# Number, numero (in Spanish-speaking areas)

Abbreviations may alter the alphabetical placement of post office names and the normal order of listings. For example, in California, SAN Diego and SN Bernardino, with the same initial element, are widely separated, as may also occur for others when abbreviations are used, such as in postal names beginning with SAINT or ST, SOUTH or S, NORTH or N, etc. When post office names exceed 13 spaces, they follow the abbreviations shown in POD Publication 59.

* * * * *

In an effort of this magnitude--i.e., the listing of discrete items of information for approximately 114,000 institutions throughout the Nation--errors and omissions are inevitable. Schools for which no data could be presented when the manuscript was being prepared for publication, but which were understood to be in operation during the 1968-69 school year, are listed by State at the end of each volume.

The user is invited to report to the Office of Education any omissions or significant corrections of data appearing in this directory.

INSTRUCTIONS AND DEFINITION OF TERMS

GENERAL. This survey is intended to develop data on schools. "A SCHOOL is a division of the school system consisting of a group of pupils composed of 1 or more grade groups, organized as one unit with 1 or more teachers to give instruction of a defined type, and housed in a school plant of 1 or more buildings. More than one school may be housed in one school plant or building, as is the case when the elementary and secondary programs are housed in the same school plant."1/ "A TEACHER is a staff member performing assigned professional activities in guiding and directing the learning experiences of pupils in an instructional situation."2/ If a teacher is assigned only part-time to this school, with the remainder of his time available to other schools or to other activities, the time assigned to teaching in this school should be prorated on the basis of a regular teaching work week and added in to the calculation of full-time equivalents. F.T.E. is expressed in decimals, to the nearest tenth.

ITEM 1A. Leave this space blank.

ITEM 1B. Enter school identification code used in your State, if any.

ITEM 2. If the school is located in a city which is not part of any county, enter here the name of the city.

ITEM 3. Use OFFICIAL name of district. The number requested here is NOT A CODE NUMBER assigned for data-processing identification, but is the numerical designation used in some States to properly identify the school district, such as River City No. 12, or Ashland R-4.

ITEM 5. Report here only work below college level.

ITEM 6. A SPECIAL PROGRAM FOR THE HANDICAPPED refers to either physically or mentally handicapped pupils.
A SPECIAL PROGRAM FOR THE EDUCATIONALLY DISADVANTAGED is a program which has as its purposes *(1)* raising the educational achievement of certain educationally deprived children to levels appropriate for their ages, and *(2)* otherwise compensating for educational disabilities suffered through experience and environment. Funds come entirely or in part from State or Federal sources.
A VOCATIONAL EDUCATION PROGRAM is an instructional program designed to prepare enrollees for employment and administered in accordance with the "approved" State Plan for Vocational Education.
An ADULT EDUCATION PROGRAM is an organized program to provide opportunity for adults and out-of-school youth to further their skills, knowledge, habits, or attitudes.

ITEMS 7, 8, and 9. Pupils and teachers should be reported on the same organizational basis. The data should be as of a date when the school has achieved enrollment stability for the Fall term, usually on or about October 1. If a school plant has both elementary and secondary grades, it should be considered as 2 schools, and separate report forms should be filled in for each level.

ITEM 10. The number of graduates should include those for the regular school year plus any 1967 summer school graduates.

ITEM 11. Respondent data may be omitted in States where the information is being supplied by the State education agency.

DATA ON PUBLIC AND NONPUBLIC ELEMENTARY AND SECONDARY DAY SCHOOLS, 1968-69

FILE SEPARATE FORMS FOR ELEMENTARY AND SECONDARY LEVELS

1. NAME AND ADDRESS OF SCHOOL *(Make any needed corrections below, including ZIP Code)*

1A. FOR USOE USE	1B. STATE IDENTIFICATION CODE

2. COUNTY IN WHICH SCHOOL IS LOCATED

3. IF PUBLIC SCHOOL, GIVE DISTRICT NAME AND/OR NUMBER

4. IF NOT PART OF A LOCAL PUBLIC SCHOOL SYSTEM, CHECK CATEGORY WHICH BEST DESCRIBES THIS SCHOOL:
A. PUBLIC: ☐ Federally Operated ☐ State Operated
B. NONPUBLIC: RELIGIOUS AFFILIATED ☐ Yes ☐ No
(If "Yes", give denomination)

BUDGET BUREAU NO. 51-S68015, APPROVAL EXPIRES: 8/31/69

FOR USOE USE

5. MARK X'S BELOW THE LOWEST AND HIGHEST GRADE IN THIS SCHOOL

Pre-K	K	1	2	3	4	5	6	7	8	9	10	11	12	Pg.

6. PROGRAMS OFFERED *(Check 1 or more)*
☐ Regular day school program
☐ Special program for the handicapped
☐ Vocational education program
☐ Special program for educationally disadvantaged
☐ Adult education program

FILL IN ALL DATA AS OF OCTOBER 1968

ORGANIZATIONAL LEVEL	NUMBER OF PUPILS	TEACHERS *(Full-time equivalents)*
7. PREPRIMARY *(Pre-K and K)*		
8. ELEMENTARY		
9. SECONDARY		

10. NUMBER OF GRADUATES FROM GRADE 12 DURING 1967-68 *(Include summer 1967)*

11. RESPONDENT: NAME

POSITION OR TITLE

AREA CODE	TELEPHONE NUMBER	EXTENSION

OE FORM 2304, 9/68 GPO : 1968 O—320-647

DETACH THIS PORTION AND MAIL IT TO U.S. OFFICE OF EDUCATION
